

Do NBA players with greater wingspan advantages shoot from further distances, whether they are interior or perimeter players?

HECTOR SANCHEZ & AJ ACCOLLA – 4/31/2026

Results: Wingspan vs. Average FG Distance by player Attribute

Experiment Data:

- Null Hypothesis: $\beta_1 = 0$
- Slope P-value= 0.066
- Interaction P-value= 0.989

Experiment Outcomes:

- Wingspan advantage affects shooting for both types of players the same
