

Do FIFA confederations receive a disproportionate share of TV audience relative to GDP share?

Bilge Iye, Jagger Hershey

Fifa Confederations

Conclusion:

Tv audience share for FIFA is strongly positive correlated with GDP share due to a near 0 p-value and the positive slope being the indicator as well as evidence that certain confederations such as UEFA and CONCACAF also have a correlation to the tv audience share due to similarly low p-values.

```
model = smf.ols(formula='tv_audience_share ~ gdp_weighted_share + C(confederation)', data=fifa).fit()
model.summary().tables[1]
```

	coef	std err	t	P> t	[0.025	0.975]
Intercept	0.4314	0.143	3.017	0.003	0.149	0.714
C(confederation)[T.CAF]	0.2990	0.192	-1.558	0.121	-0.678	0.080
C(confederation)[T.CONCACAF]	-0.5056	0.217	-2.333	0.021	-0.933	-0.078
C(confederation)[T.CONMEBOL]	0.1347	0.320	0.421	0.674	-0.496	0.766
C(confederation)[T.OFC]	-0.4211	0.299	-1.408	0.161	-1.011	0.169
C(confederation)[T.UEFA]	-0.5288	0.193	-2.738	0.007	-0.910	-0.148
gdp_weighted_share	0.7610	0.047	16.299	0.000	0.669	0.853

Equation:

$$\text{Tv_audience_share} = \beta_0 + \beta_1 * (\text{gdp_weighted_share}) + \sum \beta_k * (\text{confederation} = k) + \text{error}$$
